

NEWS RELEASE

TISSUE REGENERATION TECHNOLOGIES AND UNITED SHOCKWAVE THERAPIES JOIN FORCES

January 31, 2007 (Woodstock, Georgia) – Tissue Regeneration Technologies (“TRT”) is pleased to announce that it has secured United Shockwave Therapies, LLC (“United”) as its exclusive distributor of MultiWave systems in the U.S. podiatry market. United is the largest and most successful provider of shockwave services in the podiatry market. Upon completion of TRT’s FDA clinical trials, UST will distribute TRT MultiWave™ systems to treat plantar fasciitis and certain wound indications.

To further secure its business relationship with TRT, United placed a substantial order for TRT’s recently FDA-approved LithoGold™ lithotripter and agreed to place additional orders in the future. Additionally, United engaged TRT as its exclusive provider of repair and maintenance services for United’s substantial fleet of lithotripters and other shockwave systems. TRT’s relationship with United allows for the continued growth of TRT’s Urology division, Shockwave Technical Service. This relationship combines the nation’s most successful shockwave service provider in the podiatry market with TRT’s industry leading MultiWave™ technology developed for the wound care market.

Due to United’s unequalled reputation and their commitment to delivering quality healthcare services and maintaining the highest standards in the administration of business development, management and operations, TRT is delighted to secure this business relationship to meet the health care challenges of today and tomorrow.

About TRT

TRT is a leading-edge health care company that believes in “doing well by doing good.” Our state-of-the-art medical devices utilize MultiWave™ technology (a combination of heat, electromagnetic, acoustic, and light energies) to provide non-invasive and minimally invasive treatment for numerous pathological conditions, including chronic wounds, multiple periodontal applications, pseudoarthrosis and other avascular conditions of the bone, and ischemic heart disease. TRT is headquartered in suburban Atlanta, Georgia from which we operate our urology division, Shockwave Technical Service, and our cardiac subsidiary, Cardiac Regeneration Technologies. Production of our devices is handled by TRT’s manufacturing subsidiary, MTS Europe GmbH, located in Lake Constance, Germany. Our devices are currently CE approved and distributed in approximately 20 countries throughout North America, Europe, Asia, Africa and South America.
